RINGANA · BUSINESS PARTNER

The Opportunity

Fresh skincare from Austria — and a business you can build on your own schedule, with training and support behind you.

Why RINGANA

Most skincare is made to sit on a shelf for two to three years. RINGANA does the opposite: skincare made fresh, in small batches, with a real expiration date — because active ingredients like retinal, antioxidants, and vitamin-rich plant oils lose strength with time, air, and light. RINGANA is a family-owned Austrian company, making fresh skincare since 1996, with 30 in-house scientists and every product made in Austria. Nature and science, working together — not competing.

01

Made fresh, in small batches

Small batches made fresh about twice a week, shipped straight to your door.

02

A real expiration date, like food

Every product carries a real expiration date — so you use it while it's at full strength.

03

No synthetic preservatives

No synthetic preservatives — not even sodium benzoate. Formulas rely on freshness instead.

04

Airless glass you can send back

Airless glass packaging protects every formula, and empty bottles can be sent back for cleaning and refilling.

Two ways to be part of it

JUST HERE FOR THE SKINCARE

Customer

Shop fresh skincare and have it delivered straight to your door. No business, no requirements, nothing to keep up with — just skincare made fresh, used while it's at full strength.
